817-579-7616

Safety Sentry comes in four models that handle a range of trailer/boat weights from 200 to 12,000 pounds. The Safety Sentry works by clasping the hitch to the ball to prevent the hitch from coming off the trailer ball. Works on all standard trailer hitches including: top latch hitches, bulldog hitches, and the most popular ratchet hitch for manufactured hitches. Safety Sentry includes a Stainless Steel Lock and a Nylon Locking nut for the existing Trailer Ball. Installation time is approximately 15 minutes.

SS 200 Trailer Hitch Lock Accessory

The SS 200 Hitch Safety Security System is designed for small (up to 3,000 lbs) utility trailers, ATV trailers, and small lawn and garden trailers equipped with a 1-7/8" trailer ball coupler. This model also fits motorcycles pulling trailers that are equipped with 1-7/8" trailer couplers. A new 1-7/8" trailer ball is include for new installation, and a 2" Stainless Steel Cut Resistant/Freon Resistant Keyed Lock for security. \$64.95
